PURIFIED RABBIT IGG F(AB')₂

10MG

Catalog #: 55946

Lot #: 01509

Total Protein: 11.0 mg/ml

Volume: 2 ml

DESCRIPTION:

Product is the lyophilized powder of rabbit IgG F(ab')₂ and buffer salts.

Rabbit IgG F(ab')₂ is prepared from rabbit IgG by limited digestion with pepsin, and purified by gel filtration or affinity chromatography. The product is dialyzed into 0.01M sodium phosphate, 0.07M sodium chloride, pH 7.3, filtered through a 0.22 µm filter, vialled and lyophilized. No preservative has been added.

SPECIFICATIONS:

The product is tested for purity at a minimum of 20 mg/ml using immunoelectrophoresis. The product is rabbit IgG F(ab')₂; no trace of IgG Fc, IgA, IgM or non-immunoglobulin serum proteins is detected.

The total protein is determined using the Biuret procedure, with bovine albumin as the standard. Each vial is overfilled by approximately 10 percent so that a minimum of 10 mg of rabbit IgG F(ab')₂ is obtained upon reconstitution.

RECONSTITUTION:

Reconstitute product with 2 ml of deionized or distilled water. Gentle swirling may be used to speed rehydration. Avoid vigorous shaking of the reconstituted material.

STORAGE:

Store unopened product at 2-8°C. Store reconstituted material no longer than a few days at 2-8°C unless sodium azide is added. For long-term storage, aliquot and freeze at -20°C.

WARNING AND CAUTION:

This product is intended **FOR RESEARCH USE ONLY**, not for use in diagnostic or therapeutic procedures involving humans or animals.
