**FLUORESCHEIN-CONJUGATED RABBIT IGG FRACTION
TO β -GALACTOSIDASE(NO CROSS TO *E. COLI*) - 2ML**

Catalog #: 56032

Lot #: 03661

Total Protein: 7.4 mg/ml
F/P Ratio: 5.04 mol/mol
Antibody Protein: 3 mg/ml

DESCRIPTION:

Product is fluorescein-5-isothiocyanate (FITC "Isomer I") - conjugated rabbit IgG fraction to β -galactosidase (no cross to *E. coli*) and buffer salts.

Antibody and FITC are conjugated under defined conditions to obtain the specified molar ratio (3-6 mol/mol). Conjugated protein is purified by gel filtration. The product is dialyzed into 0.02M sodium phosphate, 0.14M sodium chloride, pH 7.3, adjusted to standard titer, filtered through a 0.22 μ m filter, and vialled. No preservative is added.

USES:

This product is suitable for use as a reagent in immunofluorescence assays (IFA), cell staining (fluorescent microscopy and cell sorting), tissue staining, and blot immunostaining.

See **Related Product Ordering Information**.

SPECIFICATIONS:

The total protein is measured by using the Biuret procedure, with bovine albumin as a standard. Antibody titer is standardized by equivalence-point precipitation. The IgG fraction is tested for purity at 20 mg/ml using immunoelectrophoresis. The product is predominantly rabbit IgG; no trace of albumin is detected. It shows reactivity to β -galactosidase and is tested by Western or dot blot to ensure monospecificity using lysates of D-lac and strain 3.3 of *E. coli*.

STORAGE:

Store unopened product at 2-8°C. For long term storage, aliquot and freeze at -20°C. **AVOID REPEATED FREEZING AND THAWING.**

WARNING AND CAUTION:

This product is intended **FOR RESEARCH USE ONLY**, not for use in diagnostic or therapeutic procedures involving humans or animals.
