

TECHNICAL INFORMATION

Catalog Number: 150343

4-Aminoantipyrine

Structure:

Molecular Formula: C₁₁H₁₃N₃O

Molecular Weight: 203.25

CAS # : 83-07-8

Synonym: Ampyrone

Physical Appearance: Yellow to orange crystalline powder

Description: A reagent for determination of chlorinated phenols, phenylglycosidase and glucose in the presence of phenol and peroxidase

Purity: 99%

Solubility: Soluble in water, ethanol, benzene; sparingly soluble in ether
